HELICOPTERS

OFFICIAL PRESS RELEASE

Atlas Helicopters provides charter to 2009 FI British Grand Prix at Silverstone

Atlas Helicopters has proved yet again to be the helicopter company of choice for the FI Drivers at the 2009 British Grand Prix. In 2008 we had the pleasure of flying Lewis Hamilton, Jensen Button and Kimi Raikonen. This year we added, Felipe Massa, Nelson Piquet and Fernando Alonso.

It is no mistake that such high profile customers decide to fly with Atlas Helicopters as we promise a complete helicopter charter and hire solution package ensuring our clients arrive on time and feeling comfortable and refreshed. On the back of the British Grand Prix, Atlas Helicopters is busy planning for this year's next major motor racing events including the Festival of Speed at Goodwood and the Moto GP at Donington.

Atlas Helicopters is looking forward to a busy Festival of Speed where not only will we be flying many household name celebrities, but yet again flying many of the world's top drivers and general public.

Although the recession is biting hard, Atlas Helicopters' charter and hire packages are proving very successful and popular proving that when an exceptional service is provided, cost does not always enter the frame.
